Mobile toilet is named for its mobility, which is opposite to the traditional fixed toilet.

Compared with the traditional toilet, the advantages are very obvious.

The mobile toilet is not restricted by any working environment. It is light in appearance and reasonable in color.

It is suitable for railway stations, docks, tourist attractions, villa areas, new residential areas, large construction sites, squares, densely populated public places and prosperous commercial streets.

Mobile public toilets have the advantages of being mobile, combined and convenient for transportation

Mobile toilet is named for its mobility, which is opposite to the traditional fixed toilet. Compared with the traditional toilet, the advantages are very obvious. The mobile toilet is not restricted by any working environment. It is light in appearance and reasonable in color. It is suitable for railway stations, docks, tourist attractions, villa areas, new residential areas, large construction sites, squares, densely populated public places and prosperous commercial streets. Mobile public toilets have the advantages of being mobile, combined and convenient for transportation.

Luxury Mobile Toilet Vans are fabricated as per the international standards utilizing quality approved components under the supervision of our skilled professionals. These Mobile Toilet Vans are acknowledged for their operational fluency, robust construction and high strength. We offer this range in various specifications which can be further custom designed as per the client's demands. In addition to this, the offered vans are equipped with functional toilets. Restroom trailers are pre-manufactured portable restrooms that sit on top of a wheels-and-chassis trailer base, and can be placed on almost any site or relocated easily.
